

This is our outdoor classroom area.

We have a wonderful herb kitchen where we can explore our herbs, mix and pour with water and chop up things we find on our daily walks.

This area of nursery is great fun but also really helps us to develop our fine motor and gross motor skills.

It also provides fantastic opportunities for developing the children's speaking and listening skills. Through playing, learning and exploring they learn to understand their senses.

The children love to use the saucepans, jugs and pans to make lunch, herb soup, pies and caseroles and even Gruffalo crumble. Shhh! Don't tell him.

We use the large bench to explore natural materials, create rubbings using leaves and fantastic pieces of art using lots of the treasures that we find on our walks.
