

## Ancient Egyptians Knowledge Organiser

### Who were the Ancient Egyptians?

Egypt is a country in Africa. People have lived in that region for thousands and thousands of years. The Ancient Egyptians settled around the River Nile, and built pyramids that you can still see there today.

### The River Nile

- The River Nile provided a route to travel across the Egypt
- The River flooded once a year, creating rich soil which was perfect for growth.
- The Ancient Egyptians became skilled boat builders, meaning they could use the River to its full potential.

King Khufu

In 1922, Howard Carter discovered the untouched tomb of King Tutankhamun. It has remained undiscovered for over 2000 years!
