

Year 5

Komodo Dragons

Hello and welcome to our new class!

I am a passionate teacher looking for children that are passionate about their learning. I will try to make your learning as fun and engaging as possible and I will be ready to investigate any questions you have on any topic!

I love travelling the world and have already been to four of the world's seven continents—we have a multi-cultural school and I love to learn about the world from the Pilgrims' Way students.

I am very sporty, care about the environment and love reading. So, I hope you will join me with these passions and bring your own into the classroom.

BE READY TO LEARN AND WE WILL HAVE A MAGICAL YEAR!

We will use my travel pictures to help us learn. I will take you on a world wide adventure filled with fronted adverbials, relative clauses and times tables!

Plus, we visit space in Year 5!

Our new class name is Komodo Dragons.

These animals live on the island of 'Komodo' in Indonesia. They are a reptile and are the world's largest living reptile. They grow to around 3m and can weigh up to 150kg!
