

Year 6

Iguana Class

Hello!

I am Mrs Pursey and I am very excited to be moving to year 6 and being your new teacher. I am lucky to have worked with many of you in the past.

I love reading, playing games and cooking, as well as learning new things. I believe in every one of you, I will support and encourage you in your learning to succeed. In return I expect you to try your best and believe in yourself. I also hope you will take on the challenge of being a great role model for the rest of the school.

I look forward to teaching you all and getting to know the newer members of the class.

We are going to have a great year, with lots of new learning and experiences .

An iguana is a tropical lizard, who is both fast and agile. There are many different types of iguanas, but they all mostly prefer warm climates with plenty of humidity. They can grow up to 6 feet long. Their physique is evolved to look like a mix between a reptile and dinosaur. Interestingly, they can communicate to each other through body language, movements and expression: this would be an interesting challenge for us to set ourselves next year.
